

LENNOX

ICT From Lennox

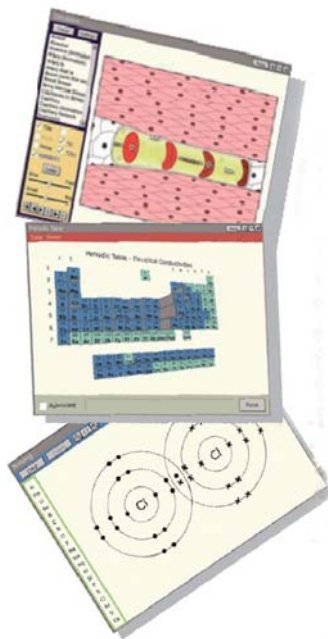

Sunflower for Science Award Winning Science Software

Sunflower for Science is extremely rich, interactive software for secondary Junior Certificate and Leaving Certificate science. It helps you with the "tricky" bits of science: difficult concepts, experiments that are hard to do and understand, and seeing the big picture by connecting scientific ideas

Sunflower for Science is a suite of 27 interactive multimedia programmes covering Chemistry, Biology and Physics with extra tools to help explore each topic further.

It comes with a wealth of resources to help you integrate it into everyday lessons.

Features:

- Examples
- Activities
- 144 different worksheets
- Sample lessons
- Self marking quizzes

Perfect to use with your digital projector and/or interactive whiteboard !

eBoard

Convert your existing whiteboard into an Interactive Whiteboard

Features:

- Easy set-up and installation; just attach the receiver to your existing whiteboard (digital projector required)
- Self install within minutes
- Use on any hard surface up to 100" diagonal
- Write on whiteboard using digital ink
- Save, record and email all your whiteboard notes

eBoard Package Includes:

- Portable receiver
- USB controller
- 2 x Interactive pens
- Mounting bracket
- eBoard software

LENNOX

Wireless data collection for your iPad, iPhone or iPod touch !

LENNOX is pleased to announce real-time data collection and analysis on your iPad, iPhone or iPod Touch—for the flexibility of science — anytime, anywhere. SPARKvue for iOS supports a wide range of displays and analysis tools including; Graphs, Digits, Meters and Statistics

Connect any of over 70 PASPORT Sensors wirelessly to your iPhone or iPod Touch.

Your choice of measurements, units and displays.

The free PASCO SPARKvue App is designed for real-time scientific investigations, student reflection and discussion with built-in annotation tools. It can be used with most Windows and Mac-based computers, interactive whiteboards, netbooks and has been optimized for handheld devices such as iPad, iPhone® and iPod touch®.

With the SPARKvue App, students can collect, view and analyze data in real-time. They can measure a wide range of phenomena—including pH, temperature, force and carbon dioxide level—by connecting any PASPORT sensors to the Apple device via the PASPORT Airlink2, a Bluetooth wireless sensor interface.

Available on the
App Store

Free for download!

For more info (and a link to the App Store), see pasco.com/iPhone
