# TRACEBoard

## Touch Sensitive Interactive Whiteboard

- Touch sensitive technology with fast response speed.
- Use your finger or the included pens to write on the board.
- Can be used as a standard whiteboard with dry markers.
- No AC power needed - board is powered through the PC's USB port.
- Surface is tear-proof, anti-scratch and resistant to chemical erosion.
- On board toolbars.
- TRACEbook Software: Create, organise & save notes, drawings and screen captures. Shade, spotlight and magnify the screen. Access free images and templates, interactive and educational content and drawing tools.
- Handwriting Recognition System: Write notes in digital ink, and then turn your handwriting into text.
- Recorder: Record presentations including audio in movie format (AVI).
- Edit directly over office software and save your notes in original format.
